

LECOP Rules

We at Citadel Engineering Company are happy to announce our latest courses from NSL.

With over 50 years of knowledge, ASCO's experience and capability help customers by transforming operational efficiency, improving processes and continuously enhancing services and systems.

ABOUT THE COURSE:

The LECOP is a document that deals with lifting operations from every aspect, that is, from the initial selection of lifting equipment through purchasing, storage, safe use, testing, and certification and finally discarded at the end of service life. This document is known as the "Lifting Equipment Control and Operations Policy" or LECOP for short. To complement this raft of references and safe operating procedures, there is also a set of "Rules" to try and improve the safety of personnel involved with lifting operations. These are called the "LECOP Rules".

The purpose of this training course is to make you aware of the rules and so improve safety in lifting operations.

ELEARNING - VIRTUAL PRICE & DURATION:

80 \$ Per Person / 1-Day Course
The Access Period is 1 year

Citadel is always dedicated to provide effective, high quality, and affordable health training to our clients and individuals.
